

Camaro Color-Matched Door Sills

INSTALLATION INSTRUCTIONS

Tools Needed:

- Adhesive Remover (if needed)
- Clean Cloth
- Rubbing Alcohol or Wipe

Driver Door: If installed, peel away existing door sills. Next, clean the surface where the door sill will be placed using adhesive remover and rubbing alcohol as necessary. Remove all residues from door sill area as new tape WILL NOT adhere if there is any residue on the surface area. Finally, peel the adhesive backing from the new door sill, line it up and adhere to vehicle. Apply pressure to each door sill for about 1-2 minutes. Do not wash this area of the car for 48 hours.

Repeat the same procedure for passenger door.
